**7.62x39 mm AR-M14SF**  
**NSN: 1005-50-001-2745**

The 5.56x45 mm and 7.62x39 mm **AR-M14SF** models are highly effective, milled receiver, select fire weapons with a right-side folding tubular stock and ambidextrous safety. The stock folding to the right permits any rail mounted optic to remain on the weapon when folded, not an option for left side folding models. The ambidextrous safety also allows manipulation of the safety even when the stock is in the folded position. This model with the 8.5" barrel makes it perfect for urban environment, vehicle crews, and compact storage.

### **Main Features:**

- Milled receiver, made from hot die forged solid blank followed by milling operations.
