7.62x39 mm AR-M4SF
NSN: 1005-50-000-1055

The 5.56x45 mm and 7.62x39 mm **AR-M4SF** models are highly effective, milled receiver, select fire weapons with a right-side folding tubular stock, ambidextrous safety, and tactical flashlight integrated into the lower handguard. The stock folding to the right permits any rail mounted optic to remain on the weapon when folded, not an option for left side folding models. The ambidextrous safety also allows manipulation of the safety even when the stock is in the folded position.

Main Features:

- Milled receiver made from hot die forged solid blank followed by milling operations.
- Chrome lined, cold hammer forged barrel providing an extremely durable and long lasting barrel that also allows for use of corrosive and surplus ammunition if needed
- Circle 10 magazines – the best, strongest, and most reliable AK magazine available
- Lower hand guard, Upper hand guard, and Pistol grip, made from glass fiber reinforced polycapromamide.
- Built-in Tactical Flashlight for target lighting.
- Rail on the receiver for attaching optic mounts
- Metal right-side folding stock.
- Additional left fire mode Selector Lever, for quick fire mode changing when the butt is folded, and for convenience of left-handed shooters.
- Commando type Sling, suitable for quick opening of fire at marching position.

Extras (Paid Separately):

- Tritium Self-illuminated Night Sight (3-dot sight system);
- 7.62x39 models - black polymer magazines for 10 and 40 cartridges;
- 5.56x45 models – 20 round magazines optional;
- Magazine packages (multiple mags per rifle – can be customized)
- Front Sight Elevation tool 1:10;
- Special Sight Carrier, enabling the attachment of Passive Collimator Sight MK-30, Optical Sight or Night Vision Device - extra.
- Set for magazines coupling;
- blank fire attachment (BFA);
- QD Package – allows use of QD ports and attachments for modern QD slings;
- Repair Kit packages available
